

**FULL-TIME FACULTY AND CIVIL SERVICE SALARIES
AT ILLINOIS COLLEGES AND UNIVERSITIES**

Submitted for: Information.

Summary: This report presents an analysis of full-time faculty salaries and non-salary benefits at Illinois public and private colleges and universities. Tables 1 through 14 present an analysis of faculty and civil service salaries for full-time employees at Illinois public and independent colleges and universities, the Illinois Mathematics and Science Academy, and higher education agencies for fiscal years 2006 through 2010. The cost of fringe benefits for full-time faculty at public and private colleges and universities and agencies is examined in Tables 15 through 19.

Action Requested: None.

STATE OF ILLINOIS
BOARD OF HIGHER EDUCATION

**FULL-TIME FACULTY AND CIVIL SERVICE SALARIES AT ILLINOIS
COLLEGES AND UNIVERSITIES**

Highlights

- In fiscal year 2010, the weighted average salary of \$77,000 at Illinois public universities was 93.9 percent of the median salary of comparison group institutions, up slightly from the previous two fiscal years.
- Faculty salaries at Illinois community colleges averaged \$66,300 annually in fiscal year 2010. The weighted average faculty salary at Illinois community colleges exceeded the median of average salaries at community colleges in selected states for all years examined, remaining relatively consistent at 109.7 percent in fiscal year 2006 to 110.0 percent in fiscal year 2010.
- The weighted average annual faculty salary of independent institutions in Illinois averaged \$93,400 in fiscal year 2010, or 107.8 percent of comparison group institutions.
- Salaries of civil service staff at Illinois higher education institutions and agencies rose 10.7 percent between fiscal years 2006 and 2010 to a statewide average of \$43,142.
- In fiscal year 2010, the average cost of fringe benefits per faculty member at Illinois public universities was \$19,900, or 73.7 percent of the comparison groups' median of \$27,000. When examining fringe benefit components individually, it is apparent that the primary factor for the lower average fringe benefit cost at Illinois public universities is retirement. Unlike Illinois, many institutions in other states participate in a retirement system *and* contribute to Social Security. When faculty salary costs are combined with fringe benefit costs, total faculty compensation at public universities averaged \$96,900 or 88.9 percent of peer group medians.
- In fiscal year 2009, the average cost of fringe benefits per faculty member at Illinois community colleges was \$17,600. However, fringe benefits provided at individual community colleges vary widely across the state, ranging from a low of \$10,700 per faculty member to a high of \$26,000.

Introduction

This report presents an analysis of salaries for full-time faculty and civil service employees at Illinois public and independent colleges and universities and the Illinois Mathematics and Science Academy (IMSA). The report includes average salaries for fiscal years 2006 through 2010 and compares salaries with the Consumer Price Index and Illinois per capita income to determine how well salaries have kept pace with those indicators. The report also compares weighted average faculty salaries at Illinois colleges and universities with median or average faculty salaries at comparable institutions in other states as a measure of salary competitiveness with faculty peers. Salaries for IMSA faculty are compared with teacher salaries at high school districts in the Chicago metropolitan area and surrounding community college districts as a measure of the competitiveness of IMSA salaries.

Faculty salary data presented in this report for public universities and independent institutions are derived from the American Association of University Professors (AAUP) Annual Faculty Compensation Survey. Faculty salary data for Illinois community colleges are derived from a report prepared by the Illinois Community College Board (ICCB). Data for states selected for comparison to Illinois community colleges were obtained from the Integrated Postsecondary Education Data Systems (IPEDS) Salaries and Fringe Benefit Survey and the ICCB.

Faculty salaries presented in this report are average nine-month salaries for full-time faculty. Historical average salary data have been adjusted to reflect the fiscal year 2010 mix of faculty among ranks at each campus to control for the effects of the changing distribution of faculty members among ranks over time. Weighted average salaries for independent colleges and universities are based on the institutions that reported data in all the years included in this report. Sources of salary data and methodologies for comparing salaries are described in the Appendix.

This report presents multi-year, rather than one-year, faculty salary increases in order to minimize anomalies that may affect one-year salary increase comparisons. It should be noted that for the years examined in this report (fiscal years 2006 through 2010), state funds for salary increases were provided in fiscal years 2007 and 2008.

The report presents all faculty salaries submitted in the AAUP Annual Faculty Compensation Survey and calculates an all-rank average that includes lecturers and non-ranked faculty. This year's report marks five years of historical data since the inclusion of lecturers and non-ranked faculty. The report also includes an average for professorial ranks (professor, associate professor, and assistant professor).

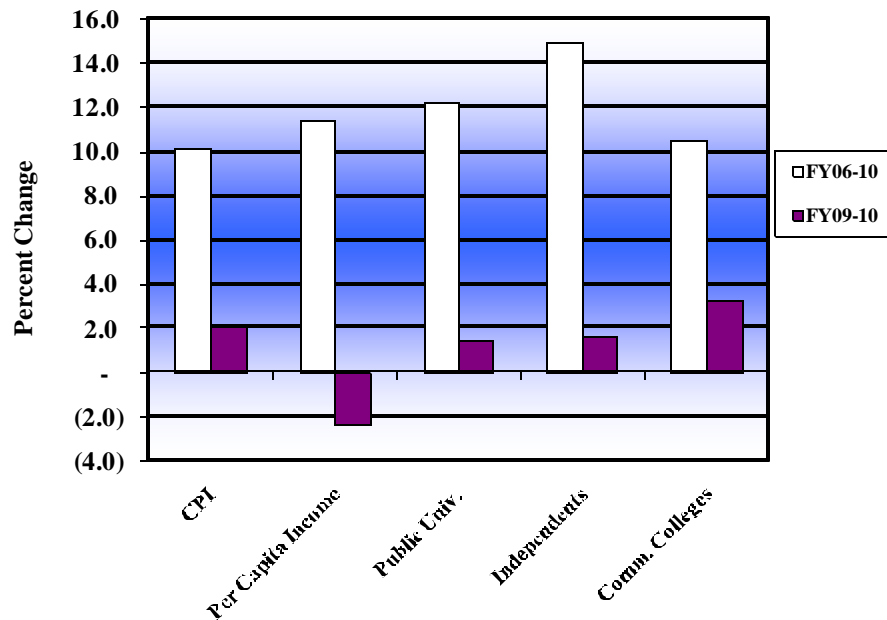

Comparison of Faculty Salaries to Economic Indicators and Peer Institutions

Table 1 displays weighted average faculty salaries for fiscal years 2006 through 2010. The weighted average fiscal year 2010 faculty salary at public universities was \$77,000, an increase of 12.3 percent over fiscal year 2006. The weighted average salary for community colleges was \$66,300, an increase of 10.5 percent over fiscal year 2006, and for independent colleges and universities the weighted average faculty salary was \$93,400, an increase of 14.9 percent above fiscal year 2006 salaries.

Table 1 also presents the Consumer Price Index (CPI) and the Illinois per capita income for each year examined in the report as comparative measures of inflation and income. Between fiscal years 2006 to 2010, growth in faculty salaries for all sectors exceeded growth in CPI;

however, from fiscal year 2009 to fiscal year 2010, only salaries at community colleges exceeded growth in CPI. Over a five-year period (fiscal years 2006 to 2010), growth in faculty salaries exceeded growth in Illinois per capita income at public universities and independent institutions but lagged behind at community colleges. Figure 1 presents a four-year (fiscal years 2006-2010) and one-year (fiscal years 2009-2010) percent change in the CPI, Illinois per capita income, and weighted average faculty salaries.

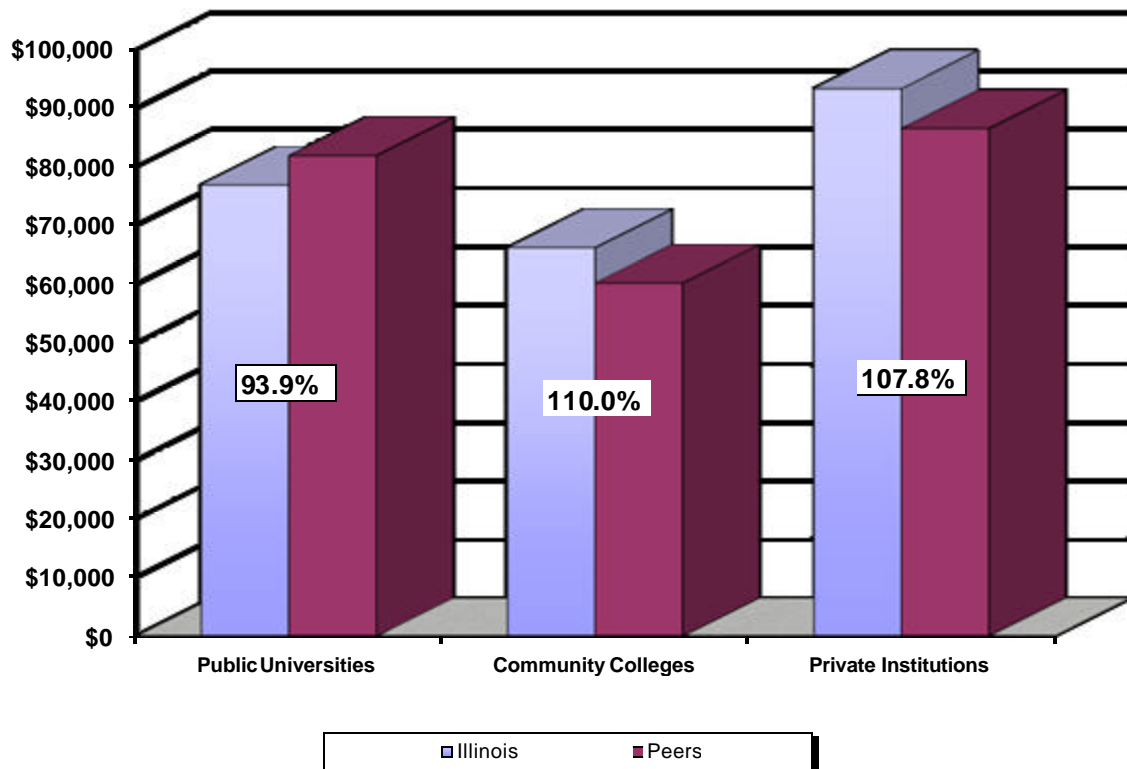

Figure 1
Consumer Price Index, Illinois Per Capita Income, and
Weighted Average Faculty Salaries

Faculty salaries can vary widely from one campus to another due to the variety of missions, programs, and geographic locations among higher education institutions. Other factors, such as faculty turnover, average length of service, and the distribution of faculty among ranks can contribute to salary variations as well. To measure the competitiveness of faculty salaries across a variety of institutions, the Illinois Board of Higher Education compares faculty salaries at Illinois institutions with salaries at similar colleges and universities nationwide. A description of the comparison methodology is included in Appendix A. A listing of all institutions in each comparison group is available from the Illinois Board of Higher Education.

Figure 2 compares the fiscal year 2010 weighted average faculty salary at Illinois institutions to median salaries at peer group institutions. It also displays the weighted average salary as a percentage of peer group median salaries. Trend data for each sector of higher education is presented in more detail in the following sections.

Figure 2
FY2010 Faculty Salaries
Illinois Average Compared to Peer Group Institutions

Public Universities

In fiscal year 2006, no state funds were provided through annual appropriations for the purpose of granting across-the-board faculty or staff salary increases; however, most institutions reallocated and raised funds in order to provide such increases. In fiscal year 2007, an increase in state funding was appropriated to public institutions in order to support (in conjunction with institutional funds) an average 2.2 percent increase in faculty and staff salaries. In fiscal year 2008, state funding was appropriated to public institutions for an average 2.8 percent increase in faculty and staff salaries. In fiscal year 2009, public institutions were required to place 2.5 percent of their appropriation into reserve, essentially keeping state appropriations flat with fiscal year 2008. In fiscal year 2010, public institutions were appropriated at the same level as in fiscal year 2009 but without a requirement to reserve funds. No state funds were provided for granting across-the-board faculty or staff salary increases.

Tables 2 through 7 present public university average salaries for all faculty classifications included in the AAUP Annual Faculty Compensation Survey (professor, associate professor, assistant professor, instructor, lecturer, and no-rank).

Table 2 presents weighted average faculty salaries by rank at each public university campus for fiscal year 2010. Averages are shown for all faculty ranks, as well as an average for professorial ranks (professor, associate professor, and assistant professor). The distribution of

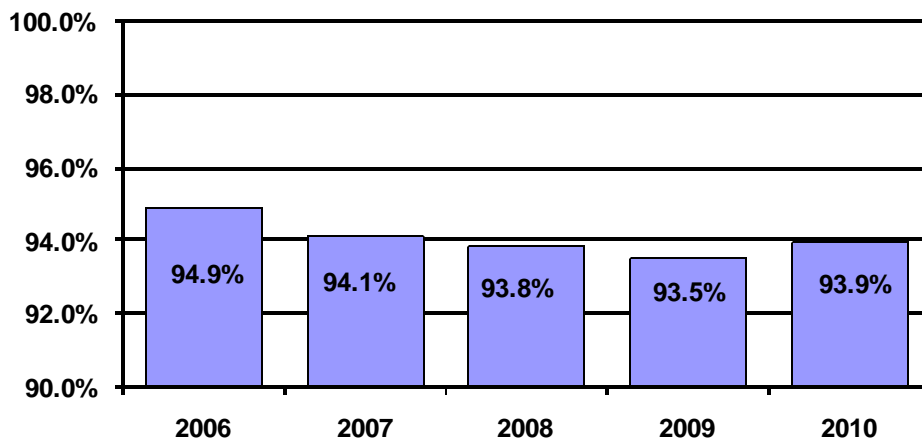

faculty among ranks is related to both length of service and professional contribution and achievement, and therefore varies from campus to campus. Average salaries increase as faculty rank changes from lecturer to full professor. By campus, average salaries range from \$58,200 at Northeastern Illinois University to \$100,100 at the University of Illinois at Urbana-Champaign. The average of professorial ranks ranges from \$64,300 at the University of Illinois Springfield to \$102,200 at the University of Illinois at Urbana-Champaign.

Table 3 presents the weighted average faculty salaries for each campus for fiscal years 2006 through 2010. Between fiscal years 2006 and 2010, the weighted average faculty salary increased by 12.3 percent. Between fiscal year 2009 and 2010, the increase in faculty salaries averaged 1.4 percent.

Public university weighted average faculty salaries exceeded the increase in the Illinois per capita income and CPI, between fiscal years 2006 and 2010. The percent changes in weighted average faculty salaries at public universities between fiscal years 2006 and 2010 vary widely from 3.6 percent at University of Illinois Springfield to 18.8 percent at Eastern Illinois University.

Figure 3 displays average all-rank faculty salaries at Illinois public universities as a percent of median salaries at peer group institutions. In fiscal year 2006, the all-rank faculty salary at Illinois public universities averaged 94.9 percent of peer institutions. Since that time, the percent of peer group median salaries has decreased slightly each year to a low of 93.5 percent in fiscal year 2009. In fiscal year 2010 the all-rank faculty salary at Illinois public universities rose slightly to 93.9 percent of peer institutions but remained below the 2006 percentage.

Figure 3
Illinois Public Universities
Weighted Average Salaries vs. Peer Group Medians

It is important to recognize that improving salaries in comparison to peer institutions is affected by a number of factors. Average salaries reported in the annual AAUP study also are affected by changes in faculty mix and changes in the total number of faculty. As institutions experience a significant number of retirements or resignations among the full professor rank, they may choose to replace those positions with lower-salaried ranks; therefore, the institution's weighted average salary may be reduced.

Figure 4 graphically illustrates the shifts that have occurred in the ranks of faculty at public universities in Illinois from fiscal year 2006 to fiscal year 2010. In fiscal year 2010, a total of 8,784 full-time faculty members were employed at public universities, an increase of 478 faculty (or 5.8 percent) over the number of faculty employed in fiscal year 2006. While the overall number of faculty increased, the proportion of faculty by rank has shifted between fiscal year 2006 and fiscal year 2010. The rank of professor has decreased from 30.4 percent of total faculty in fiscal year 2006 to 29.4 percent in fiscal year 2010, and the rank of assistant professor has decreased from 28.0 percent of total faculty in fiscal year 2006 to 26.1 percent in fiscal year 2010. During this same time period, the number of associate professors increased from 27.7 percent of faculty to 28.5 percent, the number of instructors increased from 8.8 percent to 9.3 percent, and lecturers increased from 3.7 percent to 4.8 percent. The number of no-rank faculty increased slightly from 1.6 percent to 1.8 percent of total faculty.

Figure 4
Faculty Headcount by Rank: FY2006 - FY2010

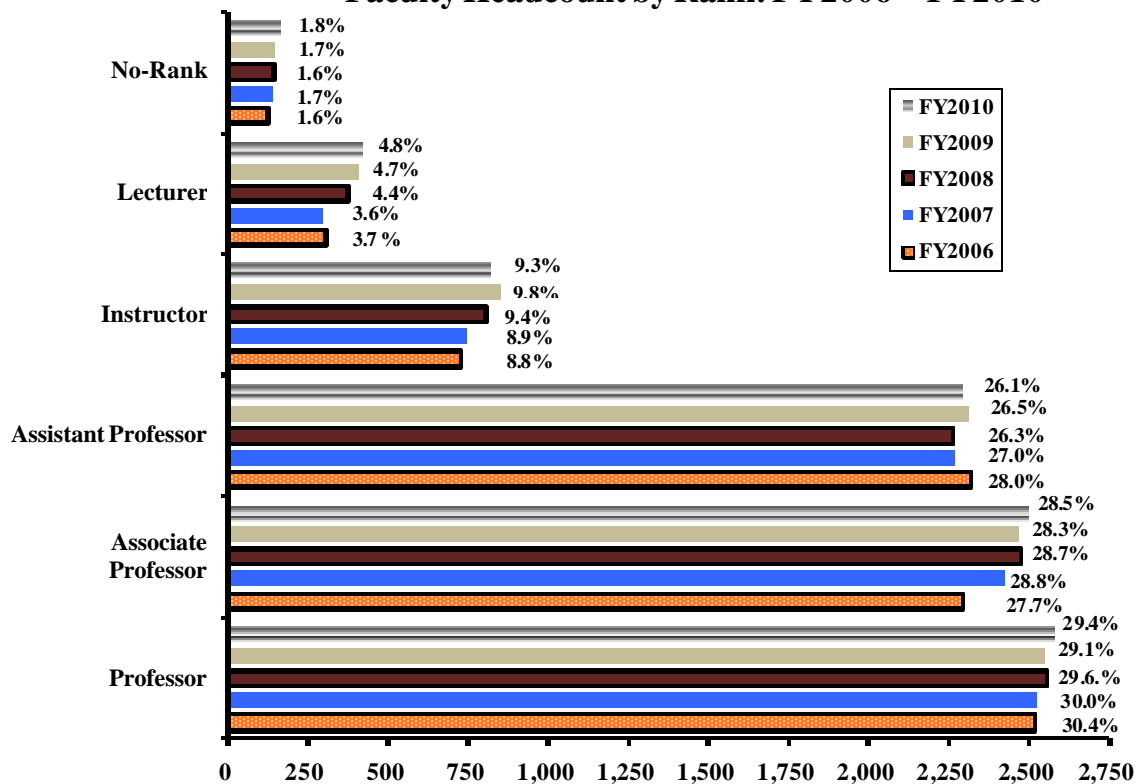

Table 4 presents weighted average all-rank faculty salaries at each public university campus as a percentage of the median salary of each campus' comparison group.¹ In fiscal year 2010, the majority of the public universities remain below their peer group standing of fiscal year 2006, with four institutions – Eastern Illinois, Illinois State University, Western Illinois University and Southern Illinois University-Carbondale – still below their peer averages, but at higher percentages than in fiscal year 2006.

Table 5 shows the fiscal year 2010 average faculty salary by rank as a percentage of comparison group medians by rank. The percentage of comparison group medians for full professors ranges from 89.2 percent at University of Illinois at Urbana - Champaign to 112.1 percent at Governors State University. The most significant variation among Illinois institutions salaries is within the instructor classification. Instructor salaries range from 78.7 percent of peer group medians at Northeastern Illinois University to 112.6 percent at the University of Illinois at Chicago.

Table 6 shows the percent change in weighted average faculty salaries between fiscal years 2008 and 2010 for Illinois public universities compared to the lowest, highest, and median changes in faculty salaries at peer group institutions. With the exception of Eastern Illinois University, Governors State University, Illinois State University, Western Illinois University and Southern Illinois University, institutions lagged the median percent increase of their peer group institutions.

Another measure of faculty salary competitiveness is the ranking of weighted average Illinois salaries to salaries at peer institutions as presented on Table 7. The table shows the highest salary and lowest salaries in each institution's peer group, the number of institutions in the group that reported in fiscal year 2010, and the ranking and the percentile of the Illinois institution's weighted average salary in relation to their individual peer institutions. For example, the weighted average salary of \$62,400 at Chicago State University ranks 43rd among the 72 institutions in the University's peer group that submitted data for fiscal year 2010. Only the University of Illinois at Chicago has a weighted average salary that ranks at or above the 50th percentile of its peer groups.

Independent Colleges and Universities

Because of their rich diversity of mission, Illinois' independent colleges and universities present a wide range in institutional and faculty characteristics and a wide range in faculty salaries. Salary data for independent institutions are presented in this report grouped by the institution's 2000 Carnegie classifications. (Definitions for the 2000 Carnegie classification codes are presented in Appendix A.)

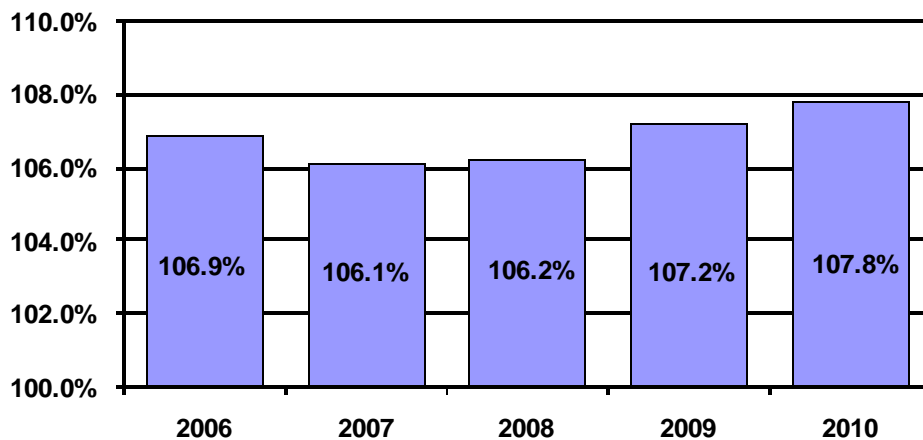

Table 8 displays the weighted average faculty salaries for 26 independent colleges and universities for the four most recent fiscal years. Weighted average faculty salaries for the group are based upon the 22 institutions that reported data in each of these years. The fiscal year 2010 weighted average faculty salary for independent institutions was \$93,400, an increase of 14.8

¹ Illinois State University's weighted average faculty salary of \$67,400 in fiscal year 2010 (shown on Table 3) represents 91.6 percent of its comparison group's median salary of \$73,581. The University of Illinois at Chicago's weighted average faculty salary of \$90,100 represents 102.0 percent of the \$88,333 median salary of its comparison group.

percent over the fiscal year 2006 weighted average of \$81,300. Salaries at institutions reporting in fiscal year 2010 ranged from \$45,000 at Quincy University to \$134,100 at Northwestern University.

Table 9 lists the weighted average faculty salaries at independent institutions as a percentage of comparison group medians. The statewide average percentage of peer group medians has remained relatively stable at independent institutions since fiscal year 2006. In fiscal year 2010, the percentage stands at 107.8 percent, up slightly from 107.2 percent in fiscal year 2009. Percentages of peer group medians from fiscal years 2006 through 2010 are shown below in Figure 5.

Figure 5
Illinois Independent Institutions
Weighted Average Salaries vs. Peer Group Medians

Community Colleges

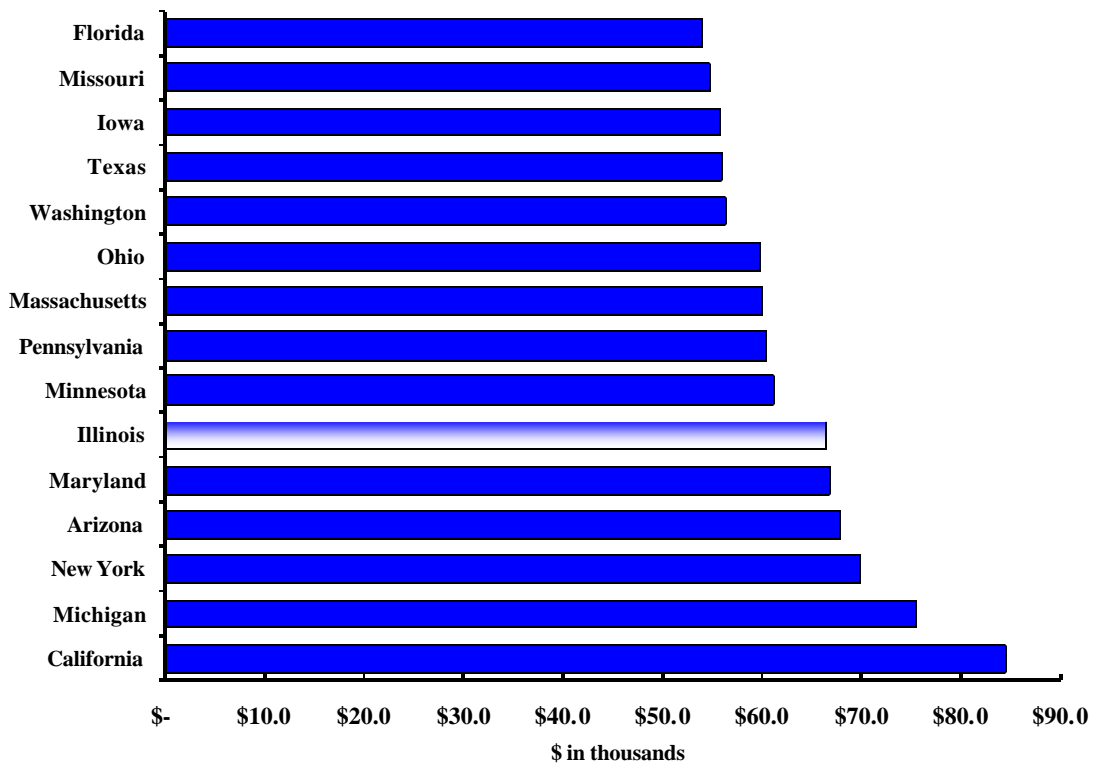

Table 10 presents average faculty salaries by Illinois community college district. Since most community college faculties are not differentiated by rank, the average full-time faculty salaries shown in this table are not weighted by rank. However, the statewide averages are weighted by the number of full-time faculty in each district. Average fiscal year 2010 faculty salaries for community colleges ranged from \$47,800 at Spoon River College to \$95,400 at the College of DuPage, illustrating the wide range of market factors, program offerings, enrollments, and access to local tax wealth among the community colleges.

Average faculty salaries at Illinois community colleges grew 5.8 percent between fiscal years 2008 and 2010. A few districts reported little growth in average faculty salaries; while two districts experienced a decrease in average faculty salaries during this time period. As noted in previous reports, this may be attributable to factors such as senior faculty retirements or resignations, positions that are generally replaced with lower-salaried faculty or left unfilled for a period of time.

Faculty salary data for selected states were obtained from the Integrated Postsecondary Education Data Systems (IPEDS) Salaries and Fringe Benefit Survey and a survey of selected states conducted by the ICCB staff. Table 11 displays the average faculty salary for all Illinois community colleges as a percent of the median of average salaries in selected states. The

average salary for all Illinois community colleges exceeds the median salaries of community colleges in those states for all years examined. In fiscal year 2010, average community college faculty salaries measured 110.0 percent of the median of salaries in the selected states. As shown below in Figure 6, the weighted average faculty salary in Illinois community colleges equals or exceeds the average faculty salary in nine of the fourteen states. The five states with average faculty salaries higher than Illinois are Arizona, California, Maryland, Michigan and New York.

Figure 6
Illinois Community Colleges
Average Salaries vs. Selected States

Illinois Mathematics and Science Academy

Table 12 presents the average faculty salaries at the Illinois Mathematics and Science Academy (IMSA) for fiscal years 2006 through 2010. For comparative purposes, the weighted average faculty salaries for public high school districts in Cook, DuPage, Lake, McHenry, and Will counties, as well as the four surrounding community college districts, are presented. Public high school salary data is obtained from the Illinois State Board of Education’s (ISBE) Illinois Teacher Salary Study. The fiscal year 2010 ISBE report was not available at the time this report was prepared.

Table 12 shows average faculty salaries at IMSA were lower than the weighted average faculty salaries in the 51 high school districts in the five surrounding counties for all years examined in this report. In fiscal year 2009, IMSA faculty salaries averaged 82.5 percent of the

comparison high school district salaries. When compared to the four surrounding community college districts, IMSA salaries were 80.6 percent of the weighted average faculty salaries at those institutions in fiscal year 2010.

Civil Service Salaries

Average salaries for the five most recent fiscal years for civil service employees at public universities and state higher education agencies are presented on Table 13. Unlike the faculty salary data, civil service salaries are not adjusted by the mix of positions each year, and are instead presented as actual average annual salaries. In fiscal year 2010, the average salary for all civil service employees was \$43,142. The increase in civil service salaries since fiscal year 2006 averaged 10.7 percent, and since fiscal year 2008 averaged 4.8 percent. Between fiscal years 2006 and 2010, the growth in average civil service salaries exceeded the growth in Illinois per capita income and CPI.

Table 14 presents civil service weighted average salaries by occupational categories as classified by the State University Civil Service System. The largest gains over the time period examined were in protective services, skilled trades (power, heat, and light services), and custodial services (domestic services), which rose 17.6 percent, 12.0 percent, and 12.0 percent, respectively, between fiscal years 2006 and 2010.

FULL-TIME FACULTY COMPENSATION AT ILLINOIS COLLEGES AND UNIVERSITIES

This report examines total compensation for full-time faculty at Illinois colleges and universities. The report adds the average cost of fringe benefits to weighted average salaries to estimate a total compensation package and compares the average total compensation for faculty at Illinois institutions to the average total compensation for faculty at peer institutions.

While salaries are often the focus in discussions concerning employee compensation competitiveness, non-salary benefits are a key component of the total compensation package. Non-salary benefits include, but are not limited to, retirement and social security costs, medical, dental, life insurance, disability, unemployment compensation, workers' compensation, tuition benefit plans, and housing. Although these benefits are not always reflected in an employee's paycheck, they represent a significant financial commitment and play an important role in attracting and retaining faculty and staff.

It should be noted that while non-salary benefits are an important part of total employee compensation, their cost and even their availability and scope might be beyond the control of an institution. For example, the Illinois General Assembly and Governor determine retirement and insurance benefits for public institutions, and the majority of state funding provided for these benefits is appropriated to entities other than the colleges and universities. Funding for the retirement system is appropriated to the State Universities Retirement System, and most funding for group health benefits has been appropriated to the Department of Healthcare and Family Services.²

The report shows the cost of major fringe benefits provided in fiscal year 2010 to full-time faculty at public universities and independent institutions and in fiscal year 2009 at community colleges. Fringe benefits for public universities and independent institutions are examined by major type of expenditure, e.g., retirement costs and group health insurance costs, in an attempt to understand the difference between Illinois institutions' average costs per faculty member and those of their peers. Fiscal year 2009 fringe benefit information is provided for individual Illinois community colleges. Since no peer groups similar to those used for public universities and independent institutions are available, a comparison of total compensation with peer institutions is not presented.

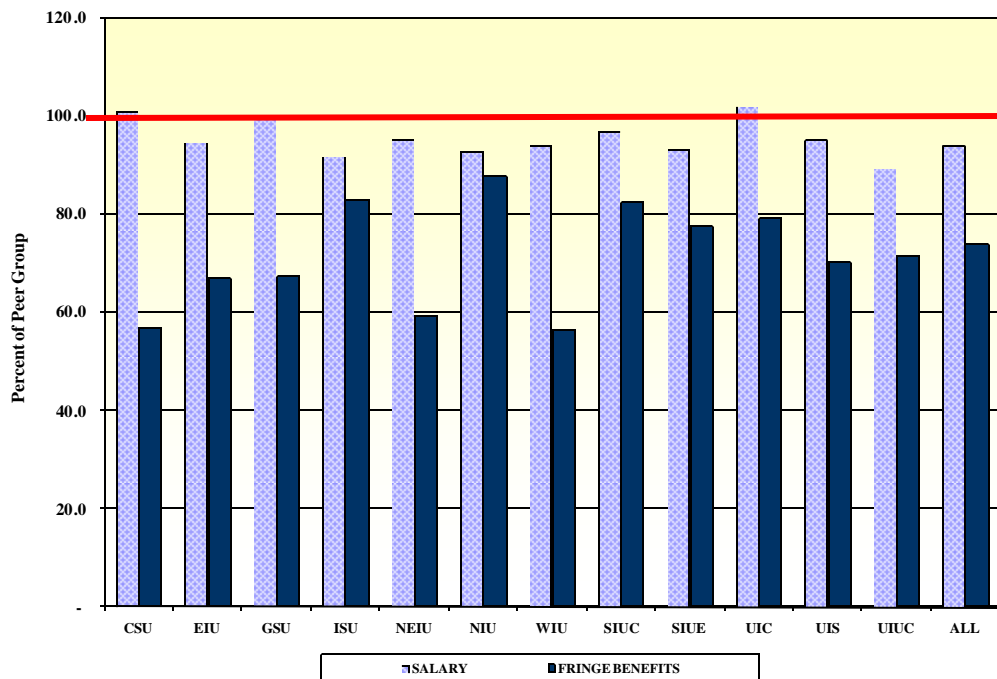

Information on public university and independent institutions fringe benefits used in this report was obtained from the IPEDS 2009-10 Salaries and Fringe Benefits Survey. This information was used in conjunction with average all-rank salaries from the AAUP salary report to estimate total compensation. IPEDS fringe benefit data includes a breakout of employee benefits by type – a breakout that is not readily available from the AAUP data set. Community college fringe benefit data were obtained from the Illinois Community College Board's annual Faculty, Staff, and Salary Survey and an estimate of the State University Retirement System's contribution on behalf of community college faculty.

² **From fiscal year** 2002 through fiscal year 2004, \$14.8 million was appropriated annually to the Illinois Board of Higher Education for transfer to the State Group Health Insurance Fund. Since fiscal year 2002, public universities have been required to contribute \$45 million annually to the state employee group insurance programs from funds appropriated to the institutions. Prior to fiscal year 2006, most state funding for group health insurance was appropriated to the Department of Central Management Services.

Statewide average figures reported in this section of the report may vary from the salary analysis due to the fact that only institutions that responded to both the AAUP and IPEDS surveys are included in the total compensation analysis.

Public Universities. Table 15 shows all-rank average faculty salaries, fringe benefits, and total compensation for Illinois public universities in fiscal year 2010. Median salaries, fringe benefits, and total compensation also are presented for each institution's peer group. During fiscal year 2010, the average all-rank faculty salary at Illinois' public universities was \$77,000, with an additional \$19,900 in fringe benefits for a total average compensation of \$96,900. When compared with peer institutions, Illinois faculty salaries averaged 93.9 percent of peer group medians, while fringe benefits averaged 73.7 percent, bring total compensation at Illinois public universities to 88.9 percent of total faculty compensation at peer institutions. Figure 7, shown below, compares weighted average salaries and fringe benefits at each university to the median of each institution's peer group.

Figure 7
Public Universities
FY2009 Weighted Average Salaries and Fringe Benefits as a Percent of Peers

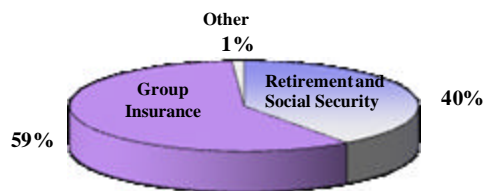

In an attempt to explain the difference in fringe benefit costs between Illinois universities and their peer institutions, Table 16 examines the major types of non-salary benefits. While Illinois institutions experience a higher average cost per faculty member in the area of insurance, i.e., group medical, dental, life, and disability insurance, the contribution made to the state's retirement system appears to be significantly less than that of other institutions and states. Group medical, dental, life, disability and other insurance costs average \$11,711 per full-time faculty member in Illinois institutions, or 135.6 percent of peer institutions' average cost of \$8,635. Group insurance benefits are provided to employees throughout retirement; this, and the level and type of benefits provided, may explain the difference.

The combined costs per faculty member of retirement and social security contributions in Illinois average \$7,960, or 56.2 percent of costs at peer institutions, in comparison to \$14,155 per faculty member at peer institutions. Illinois is one of only a few states where public college and university employees do not participate in Social Security (except that costs for Medicare coverage are assumed for employees hired after April 1, 1986). Participation by other states in the Social Security system in conjunction with other pension plans results in a higher cost per employee than provided in Illinois.

Other non-salary benefits do not represent a significant component of the compensation package. Other benefits – tuition plans, housing, unemployment, and workers’ compensation – represent less than one percent of total compensation of Illinois full-time faculty members. Information concerning tuition benefits reported to IPEDS by some Illinois institutions appears to be limited to tuition benefits to faculty members, and thus excludes partial tuition waivers awarded to dependents of certain public university staff.

Figure 8
Fiscal Year 2009 Fringe Benefit Costs per Faculty Member
Illinois Public Universities

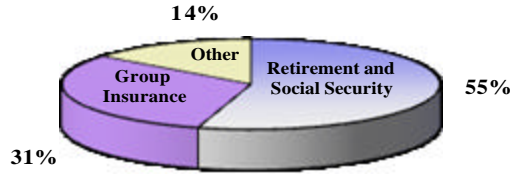

Independent Institutions. Table 17 presents fiscal year 2010 weighted average faculty compensation, including average salary and fringe benefits, for Illinois independent institutions and compares this average to the median salary and fringe benefits of comparison group institutions. Only institutions that reported fiscal year 2010 AAUP salary data and responded to the IPEDS Salaries and Fringe Benefit Survey are included in this analysis. During fiscal year 2010, the average all-rank faculty salary at Illinois independent institutions was \$93,100 with an additional \$26,300 in non-salary benefits for a total average compensation of \$119,400. The average faculty salary at Illinois independent institutions was 107.8 percent of peer group median salaries and fringe benefits were 77.9 percent of peer group medians for an overall compensation package that was 99.4 percent of comparison institutions.

Table 18 examines fiscal year 2010 fringe benefit costs per faculty member by type of expenditure, including retirement and social security, insurance costs, and other benefits. Retirement and Social Security benefit costs at independent institutions were slightly higher in Illinois than at peer institutions (101.5 percent), while group insurance costs were slightly lower in Illinois than at peer institutions (99.7 percent). Other non-salary benefits (tuition plans, housing, unemployment, and workers’ compensation) were significantly less in Illinois, measuring 33.0 percent of peer group medians.

Figure 9

**Fiscal Year 2009 Fringe Benefit Costs per Faculty Member
Illinois Independent Institutions**

Community Colleges. Fiscal year 2009 data for community colleges are presented on Table 19. Fiscal year 2009 data are the most recent available and permit a comparison among community college districts.

Table 19 presents weighted average salaries, average fringe benefits, and total compensation for Illinois community colleges by district for fiscal year 2009. Fringe benefits include the cost of the state’s contribution to the retirement system on behalf of community college faculty and other fringe benefits such as group health, dental, and life insurance, workers compensation and unemployment insurance, and tuition benefits provided by individual community college districts. Across the 39 community college districts, the average cost of fringe benefits per faculty member ranges from \$10,700 at Shawnee College to \$26,000 at Kaskaskia College. The total cost of fringe benefits per community college faculty member averaged \$17,600 in fiscal year 2009, bringing the average total compensation package for a community college faculty member to \$83,900.

APPENDIX A

DESCRIPTION OF SALARY DATA SOURCES, BOARD OF HIGHER EDUCATION COMPARISON GROUPS, AND METHODS FOR COMPARISONS

Faculty Salaries

Sources of Data

Public university and independent institution faculty salary data used in this study were reported by the American Association of University Professors (AAUP) in "The Annual Report on the Economic Status of The Profession 2009-2010," *Academe*, March-April 2010. This report excludes part-time faculty, pre-clinical and clinical medicine faculty, administrative officers that devote part of their time to classroom instruction, faculty on leave without pay, replacements for faculty on sabbatical leave, and undergraduate or graduate students serving as teaching assistants.

Salary data for some ranks of faculty within an institution may be excluded by the AAUP even though an institution's other data are included in the AAUP report. This occurs because AAUP does not publish salary data for ranks in which fewer than six faculty members are reported. This measure is intended to protect the confidentiality of individual salary information. Because relatively small numbers of faculty are excluded for this reason, this adjustment is not likely to have a significant effect on the conclusions of the Illinois Board of Higher Education's report.

The AAUP's efforts have made it possible to obtain faculty salary data in a more timely fashion than other sources of such information. However, not all institutions are included in AAUP's year-to-year efforts. Missing data generally involve small nonpublic institutions and public community colleges. Because data for many Illinois community colleges have not been consistently included in the AAUP reports over the years, salary data for Illinois' community college faculty were obtained from the Illinois Community College Board. Each community college annually provides faculty salary information to IPEDS and the Illinois Community College Board through the Faculty, Staff, and Salary Survey (C1/C2 submission).

Comparisons of Faculty Salaries

Faculty salary data for five fiscal years (2006 through 2010) are examined in this report. For each of these years, data for Illinois public universities and independent colleges and universities are compared with similar institutions nationwide. The basis for determining groups of similar institutions--labeled comparison groups--is described in a Board report, *College and University Comparison Groups* (November 5, 1985). A list of the comparison groups containing Illinois colleges and universities that are used in the report is available from the Illinois Board of Higher Education.

The comparison groups involve a total nationwide population of 1,534 colleges and universities. This total includes 273 doctoral granting institutions, 561 master's granting institutions, and 700 bachelor's granting institutions. These institutions were divided into 41 groups of institutions based upon a large number of variables that are described in the Board of Higher

Education's 1985 report. Of the 41 comparison groups, 18 contain at least one Illinois institution.

Within each comparison group, the median (midpoint) is determined for each faculty rank. A "weighted" median is then calculated using the fiscal year 2010 faculty mix for each Illinois institution. This figure is used as the point of comparison with the weighted average salary and compensation for each Illinois institution in the group. Illinois salaries and compensation are expressed as a percentage of the median of the group.

Weighted average faculty salaries for independent colleges and universities are calculated using the institutions that reported data in every year (i.e., fiscal years 2006 through 2010). In this report, the following institutions were used to calculate the weighted average faculty salaries for Illinois nonpublic institutions.

Augustana College	Loyola University of Chicago
Aurora University	Millikin University
Bradley University	Monmouth College
Concordia University	North Central College
DePaul University	Northwestern University
Elmhurst College	Quincy University
Greenville College	Roosevelt University
Illinois College	St Xavier University
Illinois Wesleyan University	Trinity Christian College
Knox College	University of Chicago
Lake Forest College	Wheaton College

The mix of faculty in each rank in fiscal year 2010 is used to control for changes in the mix of faculty over time. Furthermore, the Illinois institutions' fiscal year 2010 mix is used for computing the comparison group's median in order to control for differences in faculty mix among institutions.

No comparison groups similar to those used for public universities and independent institutions are available for Illinois community colleges. In the absence of such groups, the weighted average salary of all Illinois community colleges combined has been compared with the average salary in selected states that have large community college systems or neighbor Illinois. The Illinois average is compared with the median salary for the group of states and expressed as a percentage of the median. Faculty salary data for selected states were provided by the Illinois Community College Board from the Integrated Postsecondary Education Data Systems (IPEDS) Salaries and Fringe Benefits Surveys and a telephone survey of the selected states.

Carnegie Classifications - Definitions¹⁾

Associate's Colleges: These institutions offer associate's degree and certificate programs, but with few exceptions, award no baccalaureate degrees. This group includes institutions where, during the period studied, bachelor's degrees represented less than ten percent of all undergraduate awards.

Baccalaureate Colleges–Liberal Arts: These institutions are primarily undergraduate colleges with major emphasis on baccalaureate degree programs. During the period studied, they awarded at least half of their baccalaureate degrees in liberal arts fields.

Baccalaureate Colleges-General: These institutions are primarily undergraduate colleges with major emphasis on baccalaureate degree programs. During the period studied, they awarded less than half of their baccalaureate degrees in liberal arts fields.

Master's Colleges and Universities I: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the master's degree. During the period studied, they awarded 40 or more masters degrees per year across three or more disciplines.

Master's Colleges and Universities II: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the master's degree. During the time period studied, they awarded 20 or more masters degrees per year.

Doctoral/Research Universities-Extensive: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the doctorate. During the period studied, they awarded 50 or more doctoral degrees per year across at least 15 disciplines.

Doctoral/Research Universities-Intensive: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the doctorate. During the period studied, they awarded at least ten doctoral degrees per year across three or more disciplines.

Theological Seminaries and Other Specialized Faith-Related (Specialized Institutions): These institutions primarily offer religious instruction or train members of the clergy.

Illinois Mathematics and Science Academy

Faculty salary data used in this study were reported by the Illinois Mathematics and Science Academy and the Illinois State Board of Education (ISBE) Office of Planning, Research and Evaluation in *Illinois Teacher Salary Study* (2005-06, 2006-07, 2007-08, 2008-09, and 2009-10). The 2009-10 report will not be available until late Fall 2010. This report contains data from the teacher service record form completed annually by school district superintendents and submitted to ISBE. All data reported are salaries for full-time classroom teachers and include salary increments resulting from an additional year of teaching experience for most teachers,

additional educational attainment for some teachers, and additional pay for extra duties and extended work time if not included in the teacher's employment contract. Salaries for part-time teachers, teacher aides, and other non-teaching personnel are not included.

Civil Service Salaries

The personnel office at Northern Illinois University collects university civil service salaries annually from public universities and higher education agencies. Data are collected for the number of employees in each position and the average salary for that position. This information is compiled, grouped into occupational categories, and provided to the IBHE by the State Universities Civil Service System staff for use in the analysis.
